METAL COATING L.L.C

Advanced **Chemical Cleaning & Surface Treatment**

Specialized chemical cleaning and surface treatment for petrochemical industries and marine, delivering reliable, high-quality solutions across the Middle East.

About Us

Fortune Seven Metal Coating LLC is a well-established industrial services company, founded in 2008, with extensive experience in chemical cleaning and surface treatment services.

The company specializes in chemical cleaning for the marine and petrochemical industries, pickling and passivation of stainless steel and other metal components, chemical cleaning of boilers and cleaning of carbon steel pipeline systems.

With a technically sound and experienced team, supported by modern infrastructure, specialized equipment and well-established procedures, Fortune Seven is committed to delivering **quality, technical excellence, reliable service and competitive pricing**. Established in the UAE and serving clients across the Middle East, Fortune Seven has built a **strong reputation for quality, service excellence and professional execution**.

We are **Authorized Dealers for Pelox® Range of Chemicals, Germany in UAE and Oman**, supplying a range of high-quality chemical products for pickling, passivation, cleaning and surface treatment applications.

Chemical Cleaning

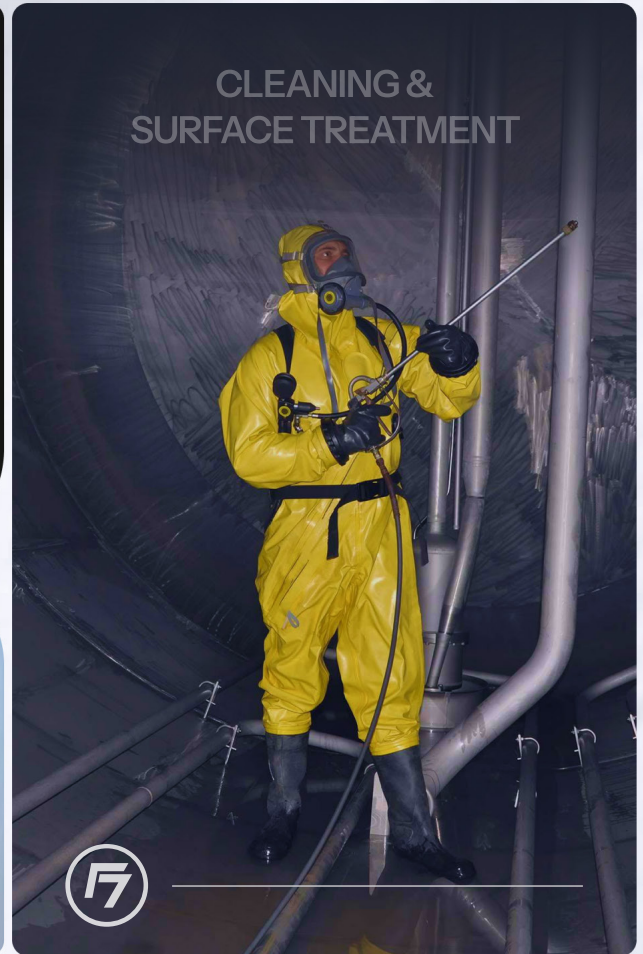

Fortune Seven Metal Coating LLC is a specialized chemical cleaning and surface treatment solutions provider, equipped with the necessary infrastructure, technology and expertise to undertake a wide range of industrial cleaning and chemical treatment applications.

We specialize in pickling and passivation of stainless steel, duplex steels, alloy steels and carbon steel components, serving a diverse range of industries.

- ♦ Oil & Gas
- ♦ Petrochemical
- ♦ Marine
- ♦ Water Treatment
- ♦ Power & Energy
- ♦ Pharmaceutical
- ♦ Food Processing
- ♦ Surgical Equipment
- ♦ Architectural Industries
- ♦ Other Industrial Applications

All chemical treatment processes are carried out in accordance with applicable international codes, standards and approved procedures.

Our main facility is located in **Sajja Industrial Area, Sharjah** and is equipped with modern tools and equipment, including:

Chemical treatment baths

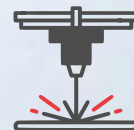

High-pressure pumps

Chemical circulation skids

Specialized cleaning equipment

Surface treatment equipment

These facilities enable us to undertake both workshop-based and site-based chemical cleaning and surface treatment projects.

Technical Services

Our technically advanced engineering services are carried out in accordance with internationally accepted standards and proven procedures under the supervision of qualified and experienced personnel.

Pickling & Passivation Services

We deliver high-grade chemical surface treatments for stainless steel equipment, including storage tanks, pressure vessels and piping systems.

Anti Corrosion Treatments & Coatings

Protect your infrastructure against severe environmental degradation with Fortune Seven's specialized corrosion control and coating services.

Pre & Post-Commissioning Services

Protect industrial infrastructure with Fortune Seven's pre- and post-commissioning cleaning for carbon steel piping and heavy equipment.

High-Pressure Retro Jetting Services

Fortune Seven provides onshore and offshore high-pressure retro jetting to clear blockages, scale and build-ups from process systems.

Hydro Blasting Services

Fortune Seven uses high-performance hydro-blasting and automated systems to clear deposits from pipes, tanks, vessels and equipment efficiently and safely.

Preservation & Maintenance Solutions

Protect critical industrial components from environmental wear and value loss with Fortune Seven's specialized preservation services.

Marine Vessel Cleaning & Maintenance Services

Protect marine systems from severe flooding, blockages and operational downtime with Fortune Seven's advisory and maintenance solutions.

Drinking Water Tank Chlorination & Water Hygiene Services

Fortune Seven provides UAE water hygiene, tank disinfection and Legionella control to keep water systems safe, compliant and clean.

Electro-Galvanizing Services

Fortune Seven provides precision electro-galvanizing to ASTM B633 and ISO 2081 standards, delivering smooth, corrosion-resistant zinc coatings with custom passivate finishes for intricate steel components.

Hot Dip Galvanization Services

Extend structural steel lifespan and eliminate rust maintenance with Fortune Seven's hot-dip galvanizing solutions.

Industrial Blasting & Painting Solutions

Ensure maximum coating adhesion and long-term corrosion protection with Fortune Seven's high-capacity surface preparation and painting services.

Electroplating & PVD Coating

Elevate aesthetic appearance and mechanical performance with Fortune Seven's advanced electroplating and PVD coating solutions.

Industrial Laser Cleaning Services

Restore metal surfaces and streamline surface preparation with Fortune Seven's high-precision laser cleaning solutions.

Food Grade Epoxy Powder Coating Service

Ensure uncompromised sanitary compliance and corrosion protection with Fortune Seven's food-grade epoxy coating solutions.

GRP Or FRP Lining System

Fortune Seven offers UAE-certified GRP and FRP lining to protect concrete and steel structures from chemicals, sewage and water ingress.

Zinc Phosphating & Manganese Phosphating Service

Fortune Seven offers ASTM F1137 and ISO 9717-compliant zinc and manganese phosphating to enhance paint adhesion, prevent galling and protect heavy-duty hardware from corrosion.

Electro Polishing Services

Achieve ultra-pure, mirror-bright metal surfaces with Fortune Seven's standardized electropolishing services.

Oxygen Level Cleaning

Fortune Seven provides certified oxygen cleaning to ASTM and CGA standards, safely eliminating fire hazards in high-pressure gas systems across the UAE.

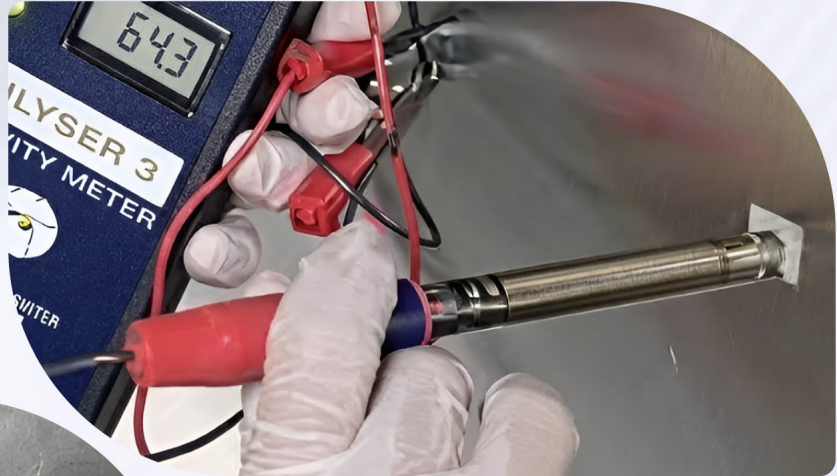

Rust Removal & VpCl Services

Fortune Seven provides chemical rust removal and VpCl treatments in the UAE to eliminate oxidation and form a protective barrier for offshore equipment and long-term asset storage.

Inspection Services

Our qualified technicians conduct a comprehensive range of testing, inspection and certification services in accordance with applicable international codes and standards.

All testing apparatus and equipment used for inspection are properly calibrated and certified to ensure reliable as well as accurate results.

Testing & Inspection Services

- ♦ White Light Inspection
- ♦ Black Light / UV Light Inspection
- ♦ Ferroxy Test / Potassium Ferricyanide
Nitric Acid Test
- ♦ White Cloth / Water Break Inspection
- ♦ Copper Sulfate Test
- ♦ Digital Passivity Testing using
Oxyliser / Koslow
- ♦ Surface Cleanliness Inspection
- ♦ Passivation Verification
- ♦ Chemical Cleaning Verification

Quality Assurance

Quality is integrated into every stage of our service execution from initial inspection and process selection to chemical treatment, testing, verification and final reporting.

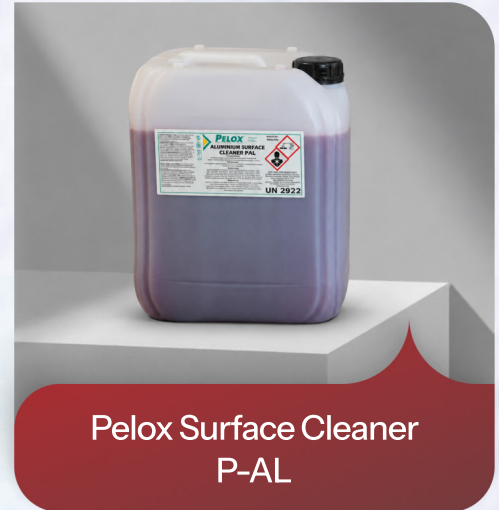

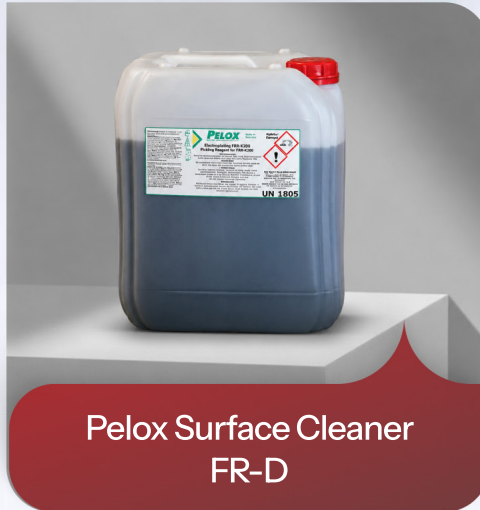

Our Quality-Driven Process

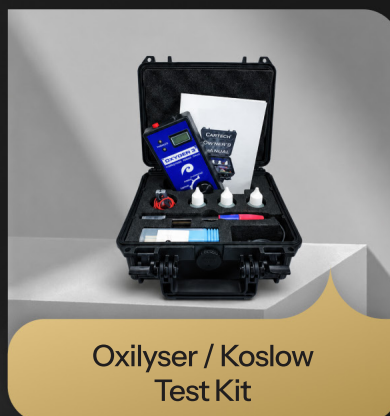

Our inspection and testing services help verify the effectiveness of cleaning, pickling, passivation and other surface treatment processes while supporting compliance with the required technical standards.

Chemical Cleaning Products

As an authorized regional partner for Pelox, we provide high performance chemical cleaning and pickling formulations designed to restore, protect and maintain stainless steel and metal surfaces across industrial applications.
